

Created by Plasma Visualization Group Client: Dr. Angel Gonzalez-Lizardo

PlasmaGraph

Polytechnic University of Puerto Rico Electrical & Computer Engineering and Computer Science Department

CS 4800 - Computer Science Senior Project Spring 2014

ABSTRACT

The Polytechnic University of Puerto Rico runs a Plasma Laboratory wherein students perform various experiments under the supervision of Dr. Angel Gonzalez-Lizardo. The laboratory's Mirror and Cusp Plasma Machine produces software "Matlab". However, the students find Matlab's user interface complex

FEATURE REQUIREMENTS

- Each variable must contain a vector of length N and width 1.
 All variables in the file must contain the same number of values.

CONSTRAINTS

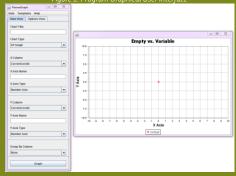

- The project will be completed with only two (2) members.
 The project will be made with the Java programming language.

DESIGN TEAM

I	Name	ID	Program	Project Role	
ĺ	Gerardo A. Navas Morales	69615	Computer Science	Project Manager	
I	Daniel E. Quintini Greco	73749	Computer Science	Design Manager	

GRAPHICAL USER INTERFACE

- Tool Settings: This window handles the options related to the tools available in PlasmaGraph, such as the Interpolation or

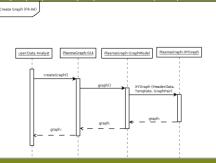

in the file via the "View Data" option on the Menu Bar.

GRAPHING

"JFreeChart" library in order to create graphs. The program obtains

TIMELINE

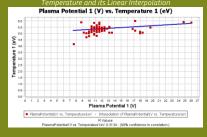

Phase A: Creation of Project Management and Requirements Documents
Phase B: Presentation of Project Management and 8 days Mon 11/11/13 Wed 11/20/13 Requirements

Phase C: Creation of Product Design, Code, and Tests 109 days Thu 11/21/13 Tue 4/22/14

Phase D: Finalization of PlasmaGraph Documentation 27 days Wed 4/23/14 Thu 5/29/14 Phase E: Presentation of PlasmaGraph Product 28 days Wed 4/23/14 Fri 5/30/14 | Luly | August September October | November December Lanuary | February | March | April | May | Luny | Luly | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | M | C | D | Phase 8: Presentation of Project Management and Re-

Phase D: Finalization of Plasmaticish D Phase E: Presentation of PlasmaGraph Product

BUDGET

PlasmaGraph Compressed Budget, Estimate				
Cost				
\$1,955.99				
\$1,989.95				
\$74,000.00				

TESTING AND CONCLUSION

Plasma Laboratory volunteer. Tests performed by a computer were designed using the white box method, whereas tests

a definite improvement over Matlab in ease of use and provided a useful subset of the data-analysis tools that Matlab provides. Program acceptance tests were scheduled and led by the Design Manager, Daniel E. Quintini Greco.

words, all the requirements and constraints were met.

FUTURE FEATURE REQUIREMENTS

PlasmaGraph should include the following additional features:
